CONTENTS

INTRODUCTION	AQUACULTURE AND PROCESSING OF COD - RESEARCH PROJECTS AND PERSPECTIVES (Jan A. Olafsen, FTFI - The Institute of Fishery Technology Research)
CHAPTER I	PLANNING AND ESTABLISHMENT OF FOOD FISH PLANT FOR COD. (Viktor Johansen & Stein A. Antonsen, VINN - The Norwegian Government's Consultative Office for the Industry of North Norway)
1.1	Introduction
1.2	The Aquaculture Act - License applications
1.2.1	Permission to operate aquaculture
1.2.2	Content of application
1.2.3	Application procedure - Process
1.2.4	Remarks
1.3	Preliminary planning and studies
1.3.1	Financial assistance
1.3.2	Conditions associated with location of aquaculture
1.3.3	Study of location - evaluation of location
1.3.4	Need for planning assistance
II	VARIOUS TYPES OF AQUACULTURE INSTALLATIONS AND ENCLOSURES (Viktor Johansen & Bjørnar Mathisen, VINN - The Norwegian Government's Consultative Office for the Industry of North Norway)
2.1	Introduction
2.2	Types of installations
2.2.1	Floating installations
2.2.2	Enclosures
2.2.3	Land-based installations
III	INVESTMENT SUMMARY FOR ESTABLISHING FOOD FISH PLANTS FOR COD (Stein A. Antonsen & Viktor Johansen, VINN - The Norwegian Government's Consultative Office for the Industry of North Norway)
3.1	Introduction
3.2	Investments
3.2.1	Marine installations
3.2.2	Land installations
3.3	Examples of various investments in cod aquaculture
3.3.1	Prerequisites
3.4	Investment summary
3.4.1	Aquaculture installation No. 1

3.4.2	Aquaculture installation No. 2
3.4.3	Aquaculture installation No. 3
3.4.4	Aquaculture installation No. 4
3.5	Additional second year investments when ensilage or wet feed is used
3.6	Planning of operations
3.6.1	Production plan
3.6.2	Working plan
3.6.3	Purchasing plan
3.6.4	Feed planning
3.6.5	Economic planning and control
IV	BIOLOGY AND HEALTH (Knut Hjelmeland, Editor, FORUT)
4.1	Introduction
4.2	The life, adaptation and environmental requirements of cod (Torstein Pedersen, FORUT/NFH - Norwegian University of Fisheries)
4.2.1	Natural range and life cycle of cod
4.2.2	Growth
4.2.3	Sexual maturity and spawning migration
4.3	Genetic structure of the cod population (Knut Jørstad, Marine Research Institute of Bergen)
4.3.1	Previous studies
4.3.2	Demonstration of genetic variations with the aid of electrophoresis
4.3.3	Genetic studies of cod
4.3.4	Multi-location studies
4.3.5	Summation and evaluations
4.4	Biological adaptation and requirements for environmental factors (Torstein Pedersen & Malcolm Jobling, FORUT/NFH - Norwegian University of Fisheries)
4.4.1	Temperature
4.4.2	Salinity
4.4.3	Oxygen requirements
4.4.4	Air bladder and preferred water depth
4.4.5	Hearing and sounds
4.4.6	Light environment and sight
4.4.7	Swimming capacity and swimming musculature
4.4.8	Choice of prey and feeding behaviour
4.4.9	Colour stability and body shape
4.4.10	Behaviour and learning capacity
4.5	Domestication/Adaptation to aquaculture (Torstein Pedersen, FORUT/NFH - Norwegian University of Fisheries)
4.5.1	Introduction
4.5.2	Selection of fry
4.5.3	Transportation of cod

4.5.4	Acclimatization to aquaculture
4.5.5	Measuring and weighing cod
4.5.6	Size range and cannibalism
4.5.7	Sexual maturity in aquaculture
4.6	Breeding and genetics (Knut Jørstad, Marine Research Institute of Bergen)
4.6.1	Breeding and breeding strategy
4.6.2	Natural populations and gene banks
4.6.3	From wild fish to aquaculture fish
4.6.4	Danger of in-breeding
4.6.5	Genetic studies - aquaculture cod
4.6.6	Current breeding methods
4.6.7	Requirements and possibilities for sterile fry
4.7	Escaped aquaculture fish - Effects on natural populations
4.7.1	International evaluations
4.7.2	Effects on natural cod populations
4.7.3	Genetically marked aquaculture cod
4.8	Growth of cod (Malcolm Jobling, NFH - Norwegian University of Fisheries)
4.8.1	Introduction
4.8.2	Growth of cod under various conditions
4.8.3	Diet, digestion and body composition
4.8.4	Recommendations and conclusions
4.9	Health and disease (Trond Jørgensen, FORUT)
4.9.1	Diseases. Prevention and treatment
4.10	Parasitic diseases in cod (Rita Hartvigsen, University of Tromsø)
4.10.1	Risk of infection. What macro-parasites are found in cod?
4.10.2	Consequences of infection
4.10.3	How does the aquaculture situation affect the chances of infection?
4.10.4	Black spot disease, Cryptosotyle Lingua, a possible problem in cod aquaculture
4.10.5	Fish tape worm in cod
4.11	Dietary diseases (Knut Hjelmeland, FORUT)
4.11.1	Introduction
4.11.2	Hunger
4.11.3	Imbalance in nutritional elements and deficiency diseases
4.12	Predation (Torstein Pedersen, FORUT/NFH - Norwegian University of Fisheries)
4.12.1	Birds
4.12.2	Fish
4.12.3	Jellyfish
4.12.4	Toxic algae

4.13	Literature list (Chapters 4.1 - 4.12)
V	QUALITY OF AQUACULTURE FISH. THE EFFECTS OF LIVING CONDITIONS, HANDLING AND STORAGE (Terje L. Jahnsen, FTFI - The Institute of Fishery Technology Research)
5.1	Introduction
5.2	Aquaculture cod/Wild cod - Quality differences
5.3	Aquaculture cod. What effects its quality?
5.3.1	Microbial activity
5.3.2	Enzymatic activity. Taste and smell.
5.3.3	Rancidity
5.4	Storage methods for fish
5.4.1	Icing
5.4.2	Modified atmospheric packaging (MAP)
5.4.3	Freezing
5.5	Can the aquaculturist affect quality?
5.6	Feed for cod
5.6.1	General comments on feed for cod
5.6.2	Feed for various sizes of cod
5.7	Preservation methods for fish feed
5.7.1	Vitamin deficiency
5.7.2	Rancidity
5.7.3	Ensilage
5.7.4	Shelf-life of various types of feed
5.8	Literature list
VI	MARKETING OPPORTUNITIES FOR AQUACULTURE FISH (Odd J. Borch & Tor A. Ljungren, Nordland Research)
6.1	Summary
6.2	Brief comments on basic conditions for cod aquaculture
6.3	General comments on markets and marketing
6.4	Various product variants and areas of utilization
6.5	Different types of customers
6.6	Physical distribution - transportation alternatives
6.7	Market communications - promotion
6.8	Conclusion - further work
6.9	Literature list
VII	ECONOMIC ANALYSIS OF COD AQUACULTURE (Jarle Løvland, FTFI - The Institute of Fishery Technology Research)
7.1	Introduction
7.2	Prerequisites for an analysis of business economics
7.2.1	Choice of technology
7.2.2	Supply of fry

7.2.3	Growth
7.2.4	Feeding
7.2.5	Short and long-term market considerations
7.3	A model for the economic analysis
7.3.1	Profit and loss model for the analysis
7.3.2	Revenue and expenses in aquaculture
7.4	Investments and capacity expenses
7.4.1	Capacity expenses
7.5	Business economics prerequisites
7.5.1	Feed costs
7.5.2	Wet feed
7.5.3	Ensilage
7.5.4	Dry feed
7.5.5	Energy content and feed factors
7.5.6	Prerequisites for fry and production cycle
7.5.7	Wages and salaries
7.5.8	Insurances
7.5.9	Other operating expenses
7.5.10	Interest on operating credit
7.5.11	Mortgage interest
7.5.12	Operating income
7.5.13	Financial return
7.5.14	Price and cost trends
7.6	Simulations of alternatives 1-4
7.6.1	Simulation model and prerequisites
7.6.2	Summation of results
7.6.3	Comparison of wild fry/pond fry with respect to costs
7.6.4	Sensitivity analyses for a 8,000 m³ installation based on aquaculture of small cod
7.7	Conclusion
7.8	Literature list
7.9	Appendices
